

SJRGCC PRS COMMITTEE REPORT 2025:

The PRS committee was created in late 2025 as an exploratory proposal body. Initial contact with CFO and office has been good and initial draft proposal has been submitted. CFO office is digging into the details and has said he will assist with any information he comes up with to help facilitate making this possible.

The CFO upon initial review saw no “show stoppers” as he put it. A draft proposal for 10 shooting bays and a 1000m range with steel targets every 100m staggered starting at the 200m mark has been presented.

Initial prospecting the land for trails, land and soil type and true distances has been started. The land is currently heavily wooded and will require some effort to clear.

New updates will be sent along to keep communications open and hope for spring time approval, if possible to proceed.
